## Professional Experience

**09.2023 – present**
Istanbul, Turkey

**Frontend Developer,** *Viva Smart Tech*
As a React Frontend Developer at Viva Smart Tech, I have successfully designed and implemented the user interface for smart devices that deliver real-time health notifications.
- Developed interactive and user-friendly interfaces for health notification devices using React.
- Established a robust communication framework using MQTT for real-time notifications.
- Ensured seamless integration with the backend system powered by Node.js, Express, and MongoDB.
- Optimized interface designs for enhanced performance and an improved user experience.

**01.2023 – 08.2023**
Istanbul, Turkey

**Frontend Developer,** *Inveon - Digital Commerce Solutions*
I am working for the Colin's TR ⇗ /MA ⇗ /UA ⇗ /RU ⇗ /RO ⇗ /EG ⇗ , Bizim Toptan ⇗ and Majestic ⇗ websites.

- Collaborated with our backend developers and project managers to ensure timely delivery of projects.
- Resolved bugs and issues reported by clients and implement fixes in a timely manner.
- Wrote clean, efficient, and reusable code that adheres to industry best practices.
- Implemented version control using Git and follow Agile development methodology.
- Participated in code reviews and provide constructive feedback to team members

**03.2021 – 01.2023**
Istanbul, Turkey

**Frontend Developer,** *Biltek Tasarım ve Yazılım A.Ş.*
Designed dynamic and browser compatible pages using HTML, CSS, SASS, jQuery, Javascript. And GSAP for animations.
- Worked as a Frontend Developer in a software agency specializing in building customized e-commerce systems and web-based solutions from the ground up.
- Ensured consistency across different devices through responsive web design principles and stayed updated on the latest technological trends in project execution.
- Enhanced team performance by fostering effective communication and collaboration in projects conducted under the Agile methodology.

**12.2020 – 02.2021**
Stara Zagora,
Bulgaria

**Frontend Developer(Contract Labor),** *Хаппеñ Тоñ*
As a React Frontend Developer, I played a pivotal role in revamping and enhancing a stock tracking program. I diligently refactored existing code, addressed bugs, and introduced new features to elevate the program's functionality and user experience.
- Conducted comprehensive code reviews and refactored the React codebase for improved readability, maintainability, and performance.
- Identified and resolved software defects, ensuring a stable and error-free operation of the stock tracking program.
- Successfully implemented new features to enhance the program's capabilities, meeting the evolving needs of users and stakeholders.
